PELICAN TRAFFIC SOLUTION

Introducing our Pedestrian Push Button with Stop Man and Walk Man indicators – an innovative solution designed to enhance pedestrian safety and streamline traffic flow. Whether you're a city planner, traffic engineer, or concerned citizen, this intuitive and user-friendly device is a game-changer for urban intersections and crosswalks.

Key Features:

- 1. Intuitive Push Button :**Our Pedestrian Push Button features a large, easy-to-press button that's accessible to pedestrians of all ages and abilities. It provides a tactile response, ensuring that users know their input has been registered.
- 2. Stop Man and Walk Man Indicators :**The built-in Stop Man and Walk Man indicators use highly visible LED lights to communicate to pedestrians when it's safe to cross. The "Walk Man" signal is a green figure indicating that pedestrians may proceed, while the "Stop Man" signal is a red figure indicating that pedestrians should wait.
- 3. Audible Alerts :**For individuals with visual impairments, our Pedestrian Push Button emits audible alerts alongside the visual indicators, making it inclusive and accessible for everyone.
- 4. Durable Construction :**Built to withstand harsh weather conditions and heavy use, our Pedestrian Push Button is constructed with high-quality materials, ensuring long-lasting performance.
- 5. Low Maintenance :**The device requires minimal maintenance, reducing operational costs for municipalities and transportation agencies.
- 6. Customizable Options :**We offer various customizable options, including button color, housing design, and audible alert preferences, allowing you to tailor the product to your specific needs.
- 7. Energy-Efficient :**Our Pedestrian Push Button is designed to be energy-efficient, helping cities reduce their carbon footprint while enhancing safety.
- 8. Easy Installation :**Installation is straightforward, and our team provides comprehensive instructions and support to ensure a hassle-free setup process.
- 9. Compliance :**Our product complies with all relevant safety and accessibility standards, making it an ideal choice for public spaces.
- 10. Proven Safety Benefits :**Numerous studies have shown that pedestrian push buttons with Stop Man and Walk Man indicators significantly reduce pedestrian accidents and improve overall traffic management.
